# Pakistan's Film Industry Graph.

Introduction:

The Graph focuses on the actors who've worked in various films in a specific period of a decade (from 2000-2010). The nodes are the actors and the edges represent actors who've worked together in a movie.

Number of Nodes	Number of Edges	Average Degree
100	250	5.0
This signifies that we took a hundred actors into consideration (so far).	This signifies that the connection between those 100 actors was measured to be 250.	At average an actor has worked with 5 actors.

Collection of Data:

We used Wikipedia to collect our data. The link to the exact page is [here](#).
